  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Score

FUNCTION: THIS MAGNESIUM DEPENDENT ENZYME CATALYZES THE HYDROLYSIS OF ATP COUPLED WITH THE TRANSLOCATION OF CALCIUM FROM THE CYTOSOL OUT OF THE CELL OR INTO ORGANELLES (BY SIMILARITY).

CATALYTIC ACTIVITY: ATP + H(2)O + Ca(2+)(In) = ADP + phosphate +
                                                                                                                                                                               BINDING DOMAIN, WHICH BINDS CALMODULIN IN A CALCIUM-FASHION (BY SIMILARITY).
SIMILARITY: BELONGS TO THE CATION TRANSPORT ATPASES
                                                                                                                                                                                                               ENZYME REGULATION: ACTIVATED BY CALMODULIN (BY SIMILARITY). SUBCELLULAR LOCATION: Integral membrane procesin. DOMAIN: THE N-TERMINUS CONTAINS AN AUTOINHIBITORY CALMODULIN-BINDING DOMAIN, WHICH BINDS CALMODULIN IN A CALCIUM-DEPENDENT

MEDIATED ENDOCYTOSIS.

***MEDIATED ENDOCYTOSIS.**

***INCLIDED TO ACTIVITY: D-myo-inositol 1,4,5-trisphosphate + (2)0 = D-myo-inositol 1,4-bisphosphate + phosphate.**

**D-myo-inositol 1,4-bisphosphate + phosphate.**

**SUBCELULLAR LOCATION: LOCALIZED MAINLY IN THE SOLUBLE FRACTION (BY SIMILARITY).**

**PATISON JINOSPHATE SUBJECTION IN POSITION 1309 IS SUPPRESSED IN ISOPORM 3, BY IS ALIOPORMS.**

**PATISON SPECIFICITY: ISOPORM 1 IS POUND IN NEONATAL BRAIN, AND IN A WIDE VARIETY OF ADULT NON-NEURONAL TISSUES. ISOPORM 2 IS EXPRESSED PREDOMINANTLY IN THE NEURONS, BUT IS ALSO FOUND IN ALL OTHER TISSUES AT MUCH LOWER LEVELS. ISOPORMS 1 AND 2 ARE DETECTED IN THE LUNG AND HEART. ISOPORM 1 IS EXPRESSED AT HIGHER LEVELS. THAN ISOPORMS 3 MITH THE 16-AMINO-ACID INSERT IS ONLY FOUND IN THE BRAIN WHILE ISOPORM 3 MITHOUT THE 16-AMINO-ACID INSERT IS POUND IN THE LUNG.**

**PEUDOMONANT BY SHORT AND BOTH ISOPORM 3 MITHOUT THE 16-AMINO-ACID INSERT IS POUND IN THE LUNG.**

  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Score
